## The Age of Stupid

📍 Screening: 24<sup>th</sup> March; DkIT, Dundalk, as listed...

The Age of Stupid is a 90-minute film about climate change, set in the future, with Oscar-nominated Pete Postlethwaite (In The 'Name of the Father', 'Brassed Off') stars as a man living alone in the devastated world of 2055, looking back at "archive" footage from 2007 and asking: why didn't we stop climate change when we had the chance?

## Urgent Issue

Time is running out to prevent runaway climate change from a scientific and a human perspective. The only way we can rapidly decrease global climate change is a binding international treaty. This is the last real opportunity to try and get a deal in place within the timescale necessary to stop catastrophe. The failure to finalise the UN climate summit in Copenhagen in December 2009 does not auger well.

It is now time to rediscover that enough is plenty. It is a huge privilege as well as an enormous responsibility to be alive today as we are the people that will succeed or fail.

## See the film then **Save the World...**

There are millions of different solutions to climate change and there is a role for everyone:

1. Recognise enough is plenty and spread the word.
2. Start cutting personal and community emissions. ([www.1010.ie](http://www.1010.ie))
3. Campaign to pressurise our leaders to lead...

➤ **But don't delay, START NOW...** 

It is planned to have an open discussion following the screening of the Movie. All are welcome...
